

Shortgrass Prescribed Burning

Principles

Workshop

Thursday, Nov. 4, 2021
9:00 AM - 4:00 PM
Mosquero Public School
Multipurpose Room
Mosquero, NM

Practice

Training

Date weather dependent
March-May 2022
Ute Creek Ranch
1856 Bueyeros Hwy
Bueyeros, NM

Are you curious about using prescribed burning in shortgrass rangelands, but not sure if it's safe, effective, or needed?

Join us for a workshop where we'll cover the reasons for burning with considerations for shortgrass prairies, what to expect after a burn, how long burn effects will last, and more, followed by a visit to the training site.

Are you interested in running a drip torch and getting hands-on experience using prescribed fire in the shortgrass prairie?

Join us on a working ranch between March and May for this unique opportunity. Participants will be contacted via email when weather conditions are suitable for burning.

For more information and to register, visit [Eventbrite Shortgrass Prescribed Burning Workshop](#) or contact Doug Cram (dgram@nmsu.edu, 575.646.8130).
